

Sunscreen Policy at Geneva Day School Summer Camp for Young Children

Dear Parents:

Appropriate sunscreen use is important to prevent skin damage and skin cancer in children. Geneva Day School Summer Camp for Young Children (Geneva Summer Camp) encourages the appropriate use of sunscreen during summer activities. At the same time, sunscreen can cause allergic reactions in a small number of children and parents may wish to be involved in decisions regarding sunscreen use for their children.

We encourage you to apply sunscreen to your child before the child attends camp for the day.

Geneva Summer Camp is happy to re-apply sunscreen to your child if they attend our All-Day Camp. We encourage parents/guardians to provide sunscreen. Please make sure you clearly label your child's sunscreen with their name. If you would like a camp staff member to re-apply sunscreen, please fill out the bottom **Sunscreen Authorization Form** and return it to a camp staff member.

Sunscreen Authorization Form

Dear Geneva Summer Camp Staff Member:

I authorize Geneva Summer Camp staff member to apply sunscreen to my son/daughter _____ (camper's name) at camp.

- Please use _____ (sunscreen brand name).
- I give permission for a Geneva Summer Camp staff member to assist the camper in the application of the sunscreen: YES NO
